Professional Summary:

Cybersecurity enthusiast with hands-on experience in Linux, networking, security tools, and vulnerability assessment. Skilled in network reconnaissance, packet analysis, log analysis, and basic security automation using Python and Bash.

Built practical cybersecurity projects and security documentation while developing knowledge of defensive security, SOC operations, and incident analysis. Passionate about continuous learning and aiming to contribute as a Cybersecurity Analyst while improving security skills.

Technical Skills:

Security Tools

- Nmap
- Wireshark
- Burp Suite
- Metasploit Framework
- Gobuster
- Nikto
- SQLmap
- Hydra
- Splunk (Basics)
- Wazuh (Basics)

Operating Systems

- Linux
- Kali Linux
- Windows

Networking

- TCP/IP
- OSI Model
- DNS

- DHCP
- HTTP/HTTPS
- SSH
- VPN
- Network Troubleshooting

Programming & Scripting

- Python
- Bash Scripting Basics

Cybersecurity Concepts

- Vulnerability Assessment
- Network Reconnaissance
- Packet Analysis
- Log Analysis
- Security Monitoring
- SIEM Monitoring (Basics)
- Windows Event Logs (Basics)
- MITRE ATT&CK Framework (Basics)
- Incident Response Basics
- OWASP Top 10

Cybersecurity Projects:

Python Network Scanner | Cybersecurity Project

- Developed a Python-based network scanner to identify active hosts and analyze network information.
- Implemented networking concepts and Python scripting for security reconnaissance.
- Documented project workflow, usage, and results.

Password Generator & Security Utility | Python

- Built a Python-based password generator and security utility.
- Implemented secure password generation using random characters and strength-based practices.
- Added documentation with execution screenshots and explanations.

Wireshark Packet Analysis

- Performed network traffic analysis using Wireshark.
- Analyzed protocols including TCP, DNS, DHCP, HTTP/HTTPS, and TLS traffic.
- Created practical documentation explaining packet captures and security observations.

Nmap Vulnerability Assessment

- Performed network reconnaissance using Nmap.
- Used different scanning techniques to identify hosts, services, and open ports.
- Documented scan results and security findings.

Security Documentation & Home Lab

- Created cybersecurity notes, tool documentation, and practical lab reports.
- Maintained GitHub repositories to showcase cybersecurity learning progress and hands-on practice.

Urban Housing Security Assessment

- Performed security analysis and assessment of the application environment.
- Identified potential security risks and documented findings.
- Applied cybersecurity concepts including vulnerability identification and security best practices.

UBI Security Analysis Project

- Conducted security evaluation and analysis as part of cybersecurity practice.
- Applied reconnaissance, analysis, and defensive security concepts.
- Documented observations, findings, and security improvements.

TryHackMe Labs & Practical Learning:

- Completed TryHackMe Pre-Security learning path covering cybersecurity fundamentals.
- Practiced networking concepts, Linux basics, operating systems, cryptography, and security fundamentals.
- Worked on hands-on security labs to understand attacker and defender perspectives.
- Developed practical knowledge of reconnaissance, vulnerability assessment, and defensive security concepts.

Certifications & Virtual Experience:

Cybersecurity Internship Completion Certificate

- Completed cybersecurity internship training with practical exposure to security concepts, tools, and industry practices.

Cybersecurity Expert Quiz Completion Certificate

- Completed cybersecurity-focused assessment covering fundamental security concepts and best practices.

ICAT Internship Quiz Certificate

- Completed internship-based cybersecurity quiz and demonstrated understanding of technical concepts.

Mastercard Cybersecurity Job Simulation

- Completed virtual job simulation focused on cybersecurity tasks and real-world security scenarios.

Deloitte Cyber Job Simulation

- Completed cybersecurity job simulation involving security analysis, problem-solving, and industry-based scenarios.

TryHackMe

- Completed Pre-Security Learning Path.
- Practiced networking, Linux, operating systems, cryptography, and cybersecurity fundamentals.

Hands-on Experience:

- Linux Administration & Command Line Practice
- Network Traffic Analysis using Wireshark
- Network Reconnaissance and Port Scanning using Nmap
- Vulnerability Assessment and Security Testing
- Security Documentation and Cybersecurity Research
- SOC Fundamentals and SIEM Monitoring Basics
- Log Analysis and Incident Response Basics
- Basic Security Automation using Python and Bash

Education:

Bachelor of Science (B.Sc.)

Biotechnology & Computer Science

Royal Institute of Management And Advanced Studies, Vikram University

2nd Year Completed

Soft Skills:

- Problem Solving
- Analytical Thinking
- Continuous Learning
- Attention to Detail
- Team Collaboration
- Time Management
- Technical Documentation
